IN Books which are published as Guides to Travellers, Accuracy must ever be regarded as the principal object; the Proprietor therefore deems it incumbent upon him to state the Authorities under which this ITINERARY was first published. It might, perhaps, be sufficient to say, that it was brought forward under the sanction of *His Majesty's Postmaster General*: but he cannot avail himself of such an indulgence without noticing the circumstances which procured him that very honourable patronage.

Having had it in command from the *Postmaster General* to make a Survey, under the direction of Mr. HASKER, the late Surveyor and Superintendent of the Mail Coaches, of all the *principal Roads* throughout the kingdom, for official purposes, the accuracy of which (*as required by an Act of Queen Anne, for all Roads measured on account of the GENERAL POST OFFICE*) is attested on the oaths of the several Surveyors employed, it was deemed to be a Work of such utility to the Public, that it ought not to be withheld; as, from the precision with which it was executed, much benefit might accrue to the Traveller; and as the distances on those Roads were planned from one stationary object to another, it would enable him to determine, beyond dispute, the exact length of his stages.

Extensive as was this Survey, it was nevertheless considered not to embrace the whole of those Roads to which the Traveller might wish occasionally to refer; therefore the Proprietor has, with great industry and care, selected from the County Surveys such other Roads as appeared to him essential, the distances on which, although not regulated by his own Survey, and, of course, not calculated from one stationary mark to another, yet he has every reason to believe are faithful, the whole being verified by the different Postmasters throughout the kingdom, and officially communicated by letter to FRANCIS FREELING, Esq. Secretary to the General Post Office, and THOMAS HASKER, Esq. the late Superintendent of the Mail Coaches, and by them forwarded to the Author. Through the same channel he also received a List of such Inns as supply Post Horses and Carriages (which are added at the end of each Route), Seats, &c. &c.

FIFTH

FIFTH EDITION.

ANXIOUS to preserve the good opinion of the Public, the Proprietor has used his utmost endeavours to correct those errors to which a publication of this description must always be liable; and he has so arranged the Remarks which accompany the Roads, as that they and the Route to which they refer, present themselves to the eye of the reader at the same time.

The Time of the Mail's Arrival at and Departure from each Town—the specification of the corporate Towns, and of those at which the Assizes are held—the Course of the Rivers crossed on the Routes, and the Line of the navigable Canals, describing their length, and showing the places through which they pass—the Inns on the road which supply Post Horses and Carriages; also, those Inns in the Metropolis whence the Mail and Stage Coaches depart (showing the Route they take by reference to the Itinerary; the Time of their Departure from London, and Arrival at their respective Inns in the Country; likewise the Time of their Departure thence, and Arrival in Town)—several additional Cross Roads—the Circuits of the Judges—the Rates of Postage in Great Britain—with Maps of the Isle of Wight, the Environs of London, Bath, Brighton, Cheltenham, and the Lake, are added Routes to upwards of NINE THOUSAND Places, lying off from the main Roads, and which will not be found in any other work of this description.

NINTH EDITION.

THE Author, grateful for the patronage with which the Public has honoured his Work, once more offers his grateful acknowledgments. In the present Edition he begs to observe, that the Postmaster General having kindly permitted him to avail himself of the assistance of the Country Post Masters, he has been enabled to make many very important additions, and upwards of 800 seats are inserted, which have not appeared in any former edition. Also a very particular account of the New Holyhead Mail Road, pointing out the improvements which are already made, and those still in contemplation, accompanied with a Map.

DIRECT ROADS.

That the Distances may correspond as nearly as possible with the Milestones on these Roads, they are reckoned from the customary standards.

At the conclusion of each Route, where the length is such as to render it useful, a *Return Route* is added, exhibiting at one view the immediate distance from stage to stage, without the trouble of subtracting; to which method of calculation the Traveller would otherwise find it necessary to resort. The reckoning on this Back Route is also continued to the *General Post Office*, for the purpose of preserving the plan of the First Edition to those who may consider it essential.

CROSS ROADS.

To this part of the Work great Additions have also been made, and several Roads introduced, which are not described in any other publication of this nature.—The INDEX to these Roads is likewise so arranged as to afford an easy and direct reference to each Route.

SEATS

The Proprietor has to acknowledge infinite obligations to his Friends for numerous Additions and Corrections, which they have kindly communicated, and which have enabled him to extend his List of Seats, and render it as perfect as the nature of

ADVERTISEMENT.

the work will admit; but as this part of the Publication is necessarily liable to some inaccuracies, even during its printing, he hopes that, where any errors may be perceived, they will not be imputed to negligence; as the utmost care has been taken to render the List correct; and he earnestly solicits those who may do him the honour of making this Book their travelling Companion, that they will have the goodness to transmit any additional information for the improvement of the Work; and their communications shall be carefully attended to and gratefully acknowledged. A full and complete Index to the Seats is given at the end of the Work, with particular reference to the page where they are noticed.

MAP.

The Map of England and Wales, has been executed with the greatest care and attention, and exhibits the whole of the Roads contained in this Work, particularly describing those on which the Mail Coaches travel.

Figures of Reference are added to the Cross Roads, corresponding with the number of the Route wherein they are described; thus affording an additional Index to those Roads, and giving facility to the Traveller in tracing his Route in every direction, and to any extent.

Surveyors employed in measuring the Roads described in this Work.

GEORGE GRETTON, Liverpool.
RICHARD WOLLAMS, Shirleywich.
JOHN BURTON, Lancaster.
JOSEPH SINGER, Littleton, Devon.
L. HEBERT, Strand.

The Measurements, which are taken in miles and furlongs, are arranged in columns; the first and second giving the distance from one City, Town, or Village, to the next; the third and fourth, the number of miles from the commencement of the Road.

Example.—Page 3.

ADVERTISEMENT.

Thus, the distance is given for Shooter's Hill in the third and fourth columns, eight miles one furlong; and in the continuation of the Road to Dartford you find the measurement to that place from London to be fourteen miles six furlongs.

General Directions for tracing the Roads.

Suppose you want the Road from London to Doncaster—look for the name of that place in the *Index to the Direct Roads from London*, and the figure opposite to it (351) refers to the page in which is that part of the Road containing Doncaster, though the description of the Road in which it is situated (being that from London to Carlisle and Glasgow) begins in page 343, and ends in page 360.

In describing the lesser Roads branching from the greater, the last remarkable place on the great Road, or the spot where the lesser turns off, is first given, with a reference to the page in which you will find the Road so far as to that place; and afterwards the Branch is continued: for instance, to find the Road from London to Weymouth, the Index refers you for Weymouth to page 84, where you find it in the following form, viz.

To Dorchester, p. 56	M	F	M	F
Winterborne Monckton	2	—	119	6
Brodeway	2	7	121	6
Melcomb Regis	2	5	124	5
Weymouth	2	5	127	2
	—	4	127	6

By which it appears you are referred to page 56 for this Road as far as Dorchester (the last remarkable place on the great Road); and the remainder of the Road to Weymouth is given in page 84, as directed by the Index. These References are made use of in order to prevent the numberless repetitions, which would otherwise unavoidably occur, and thereby swell the Book to an inconvenient size.

The Index to the Cross Roads, it is conceived, is so copious and explicit, as to require no further explanation than what is given at the beginning of it.

The Author having before observed how much he should feel obliged to those Travellers who would do him the favour of correcting any Error which they may occasionally detect in this Work, it may appear intrusive again to solicit their attention; but he hopes his anxiety will be excused, in consideration of the advantage which the Public must feel, in having a Work of this nature correct in all its parts, and that to render it so exceeds the possibility of individual exertion.—In the performance of this task, he has used his utmost endeavours to make his Book complete, and flatters himself, that in the Delineation of the Roads few Errors will be found; but it scarcely needs remark, that in giving the numerous Seats which this Work describes, some mistakes must occur, to rectify which, he takes the liberty of observing, that nothing can so effectually contribute, as the information of the intelligent Traveller, whose assistance he most particularly requests; as also that of Gentlemen of local information, to whom he would consider himself highly indebted for their communications, to which the utmost attention will be paid.

It would add to the obligation, if Gentlemen, when they communicate information, would have the goodness to sign their Name and Address, as it frequently happens that further explanation is necessary, and it would remove any doubt as to authenticity.

CLARK and LEWIS, HUMBOLDT, FLINDERS, ELPHINSTONE, and the Discoveries
of Captains ROSS and PARRY towards the North Pole, which have enabled him
to make many very important additions and alterations: the utmost pains have
been taken to render his Globes both exact and elegant, and he flatters him-
self that they exhibit every improvement to the present time.

TABLES, shewing the immediate Route from the Metropolis to upwards of 9,000 Places lying off from the Main Roads throughout ENGLAND and WALES.

The following Tables are intended to shew the immediate Route from the Metropolis to those places which, lying off from the Main Road, could not be described in the body of the work. References are added shewing the Route to be taken by the Traveller, as also the place on the road nearest to that which is sought.

EXAMPLE:—Suppose you want the Road from London to Abbenhall,—refer for that place in this Table, and you will find it described 2 mls. *l* (2 miles to the left) of Longhope, which place, as arranged in the next column, will be found in page 196, and your Route will therefore be directed through Uxbridge, Beaconsfield, High Wycombe, Oxford, Witney, Northleach, Cheltenham, and Gloucester, to Longhope, where, as expressed in the Table, you turn to the left, and at about the distance of 2 miles is situate Abbenhall.

Note.—In selecting the roads to which the references are made, we have considered it an accommodation to select those (when it could be done) on which stage-coaches travel—it may also be proper to observe that where the traveller may require to be forwarded by Post chaise, he must oftentimes stop short of our reference, or otherwise proceed to the next stage beyond it—as in the above example, he must either stop at Gloucester, or proceed to Ross, the next stage from Gloucester.

The direction *r* and *l* are not to be understood always to mean directly *right* and *left* of the places referred to, but right and left of the road on which you are travelling, as the places sought with in many instances lie forward, or obliquely, of the reference, in a direction thus,

in such case, we have signified the same by adding an *o* to the letters *r* and *l*.—Thus *r. o.* right oblique, *l. o.* left oblique.

INDEX OF PLACES

WHICH OCCUR IN THE
ROUTES OF THE DIFFERENT COACHES
GOING FROM THE METROPOLIS.

Places printed in the Roman Character are those through which Coaches pass in the Prosecution of their Journey to some Town more remote from the Metropolis.

The *Italic* Character denotes that there are Coaches whose Journeys terminate at the Place; the References to such Coaches are printed within Brackets []: where other Figures follow those included within the Brackets, they relate to Coaches which pass through the Place.

M. following the Figure of Reference, signifies the Mail Coach.

The Numbers opposite the Name of each Place correspond with those annexed to the Coaches in the List of Inns which immediately succeeds this Index.

EXAMPLE.

Supposing a Conveyance to Aberford to be wanted—see in this Index the Name of Aberford, and the Numbers opposite, 237, 563;—turn to either of these Numbers in the List of Inns, where will be found the Coach which passes through that Place; viz. [237], Aberdeen and Edinburgh Coach, Bull and Mouth Inn; &c. &c.

CARY'S IMPROVED MAP OF ENGLAND.

THE Publisher commenced the undertaking from a conviction that a Map of England upon a scale of sufficient magnitude to mark down the situation of Gentlemen's Seats through the country was a desideratum in English Geography; it is his intention to distinguish them in a prominent manner from the farm-houses and inferior buildings. To do this accurately, he feels that he must have recourse to local residents; and will therefore be highly obliged if favoured with the names of Gentlemen who would have the goodness to revise the objects delineated in their immediate neighbourhood, as it is his anxious wish to render the orthography of the Map as correct as possible, which can only be effected by the assistance of Gentlemen who have local knowledge of the country.

It has long been a subject of complaint, that in the County Atlases the country is represented in a disjointed and unconnected form, the scale being generally regulated by the size of the paper, and not by that of the county; Rutland, for instance, being upon as large a sheet as Devonshire, conveying to the eye a false impression of their relative magnitudes: while, from the variety of scales and the imperfect manner in which the confines are laid down, it is scarcely possible to trace the connexion between adjoining counties.

The situation of Towns, Villages, Hamlets, and the Gentlemen's Seats, will be faithfully delineated, as well as the Roman Roads and Stations, and every other object tending to illustrate either the history or the antiquities of the country; at the same time great care will be taken to avoid confusion in the arrangement of the objects. The whole of the Turnpike Roads will be marked down, as well as the Parish Roads; distinguishing the Carriage Roads from the Bye Roads, which has never yet been attempted in any Map of England, and which the Publisher flatters himself will be found of considerable importance to the Traveller. The courses of the Canals and Rivers, as well as the navigable extent of the latter, will be shown.

The unnecessary degree of blackness which prevails in our best Maps, confounds the objects, and makes it extremely difficult to read the names or distinguish the features of the country. The Publisher feels fully confident that, by the plan he has adopted, he will be enabled completely to obviate this objection, and that the high grounds, with their proportionate expansion, will be distinctly shown, without injuring the perspicuity of the Map; and that dazzling effect which prevents the eye from readily catching the object sought, will be most carefully guarded against.

The Map is laid down to a scale of Two Miles to an Inch, and will consist of Sixty-three Sheets, which may be mounted in any number of sections, or bound up to form a handsome volume, the size of Cary's Universal Atlas; and, to render it more convenient in this form, portions of the Map are repeated, so that the connexion may be more readily traced. The size of each sheet will be 24 inches by 19 inches.

The Map will be published in 14 Parts: the Price of each Part will be One Guinea, or 5s. 6d. for a single Sheet.

Those Gentlemen who intend to honour the Work with their patronage, and wish to obtain early impressions, are requested to transmit their names, either through their Booksellers or to the Publisher, JOHN CARY, 86, St. James's Street; as the copies will be delivered according to the date of the order.

Parts I. and II. are now published, containing the whole of CORNWALL, DEVONSHIRE, and DORSETSHIRE, with considerable portions of SOMERSETSHIRE, HAMPSHIRE, and SUSSEX.

ROADS IN THE ISLE OF WIGHT.

From Southampton to Cowes, Isle of Wight, the Distance is about Fifteen Miles. Two Vessels sail every Morning, and return in the Afternoon. From Portsmouth to Ryde is about Seven Miles, with similar Conveyances; and Wherries may be procured from either Place at all Hours.

As the chief Object of the Traveller in the Island is Pleasure, we have endeavoured to point out a few Routes in which the most striking and picturesque Spots may be visited in the shortest possible Time. We shall commence from Newport, as the most central Point, where Accommodation and Conveyances of every Description may be the most readily procured. These Routes are inserted merely to give an Idea of what may be accomplished;—but the Days of Midsummer will not be found too long for any of them.

Cowes and Ryde are much frequented during the Summer Months, and Excursions from either may be made and varied at Pleasure. The Traveller has only Occasion to keep in Mind the Places where Accommodation and Refreshment can be procured.

INNS. *Newport and Ryde*, as p. 77.

When it is High Water at *Newport*, the *Medina* is seen to Advantage on the Road to *Wotton Bridge*.

Wotton Bridge, a little before, on r. *Fern Hill*, built by the late *Sir Thos. Orde*, when Governor of the Island; now — *Saunders, Esq.*

At *Wotton Bridge*, on r. *Kite Hill*, covered with Ivy, *Mrs. Popham*; and about 1½ m. beyond, on l. is *Quarr Abbey*, of which little remains ex-

cept its Walls, inclosing about 40 Acres: the Woods, though small, with those of *Nunwell* and a few adjacent ones, are almost the only Remains of Timber in the Island, which at one Period it seems to have produced in Abundance.

Binstead Parsonage and *Mrs. Fleming's Cottage* are interesting, particularly the Walk to the Shore, where the Oaks literally spring from the Ocean.

Ryde has of late been very much frequented, and the following Noblemen and Gentlemen have added much to its Populousness by building, viz. *Earl Spencer*, the *Marquis of Buckingham*, *G. Pleyer, Esq.* &c. The Pier, which suffered so much from a severe Gale in March 1818, is now completely restored.

From *Ryde*, on l. are *Apley, Captain Hutt*; *St. John's, E. Simeon, Esq.*; *Fairy Hill*, the late *Rev. C. Glynn*; and *Sea Grove*, — *Smith, Esq.*

At the *Priory*, late *Sir Nash Grose*—now *Wm. Anville, Esq.*: most of the exotic Plants flourish in the open air, but the Grounds are now no longer open to the Public.

Brading and Ashley Downs command extensive Views; on the latter is a Sea Mark for Ships entering *Spithead*.

very uninteresting: on l. see a Pil-

Stratford on Avon.—This Town is particularly celebrated as the Birth-place of Shakspeare, who died in 1616, and has a neat Monument in the Church. The noted Mulberry-tree which grew in the Gardens of the Author was destroyed by a Successor, and sold to a Carpenter, who ingeniously worked it into various Ornaments and Trinkets. Here, in Sept. 1769, was the first Commemoration of Shakspeare's Jubilee, which lasted three Days, during which Time every Species of Entertainment was exhibited. In the Guildhall is a large Room, called Shakspeare's Hall, in which are two excellent Paintings, of Shakspeare and Garrick. The Church is a noble Building, with a lofty Spire.

The *Stratford on Avon Canal* commences at *Stratford*; has a Branch about 4 M. from it, which goes to *Binton*, passes near *Henley* in *Arden* to *Lapworth*, where a Cut unites it with the *Birmingham Navigations*; thence to *Hockley* (where a Branch goes to *Taunworth*) and *King's Norton*, where it unites with the *Worcester and Birmingham Canal*.

Ludlow is a very ancient Town, and sends 2 Members to Parliament. The Church is a venerable Structure, in the Gothic Style, with large and lofty Windows of painted Glass; and a Number of antique Monuments and Inscriptions, particularly one relating to Prince Arthur, Brother to Henry VIII. whose Bowels were deposited here. The Castle, standing at the West End of the Town, is supposed to have been built by Roger de Montgomery, Earl of Shrewsbury. Various Possessors appear to have held and been deprived of Ludlow Castle, till the Reign of Henry VI. when Richard Plantagenet, Duke of York; here set up his Standard; but being killed at the Battle of Wakefield, it was seized by the King's Forces. All the once royal Rooms of State now lie open, the whole being ruinous,

and covered with Ivy. Its Situation is beautiful.

At the Viduals, near *Ludlow*, is seen a most delightful Prospect.

The Castle stands on an Eminence North of the Town, and appears to have been a very stately Building; little of it now remains. On a Hill near the Castle is a stupendous British Post; the Approach is guarded by 4 Ditches, having two or three Entrances toward the principal Work.

**GREAT AND DIRECT ROADS
MEASURED FROM SHOREDITCH CHURCH.**

The Measurement as far as the Wheatakeaf Inn at Alconbury Hill (see p. 344) is reckoned from Hicks's Hall Standard, as well as from the Shoreditch Church Standard; the first going by Barnet, and described in Pages 343, 344; the latter as follows, by Ware, which is 4 M. 1 F. nearer than the Barnet Road; on which Account (as the Milestones after Alconbury Hill reckon from Hicks's Hall Standard) the Distances marked on this Road will no longer correspond with the Milestones; and all Roads given as Branches from the Road we are now about to describe, will consequently be much nearer than if taken from Hicks's Hall Standard.

A BRIEF ACCOUNT

Of Bath, Bristol, Cambridge, Canterbury, Dover, Liverpool, and Oxford.

BATH,

A City in the Hundred of Bathforum, Somerset, is governed by a Mayor, 8 Aldermen, and 24 Common Councilmen, and sends 2 Members to Parliament, which are chosen by the Corporation; and, joined with Wells, forms a Bishopric, called the Diocese of Bath and Wells: it contains 4 Parishes, viz. St. James, St. Michael, the Abbey Church (or St. Peter and St. Paul, Walcot), and Christchurch. According to the Returns made in 1811, it has 4279 Houses, and contains 31,496 Inhabitants.

It is famous for its medicinal Springs, which are highly serviceable in bilious Complaints, as well as in nervous, paralytic, rheumatic, and gouty Disorders: their first Discovery appears to have been by the Romans, in the Year 44. The Baths consist of the King's, the Queen's, the Cross, the Hot, the Corporation, and the Duke of Kingston's. At the King's Bath is a handsome Pump Room, where the Company drink the Waters in the Morning, having an excellent Band of Music; the Bath, a large Basin of 65 Feet by 40, contains rather more than 346 Tens of Water, when filled to its usual Height. Two commodious Rooms are connected with this Bath, fitted up with Pumps and Pipes to direct the hot Water to any particular Part of the Body. The Queen's Bath, which is attached to the King's, forms a Square of 25 Feet, and is furnished with the same Conveniencess. The Cross Bath is of a triangular Form, and has a small neat Pump Room attached to it. The usual Time of Bathing in the King's Bath and Cross Bath is between Six and Nine in the Morning. The Seasons are the Spring and Fall. The Hot Bath stands about 40 Yards S. W. of the King's, and is so called from the superior Heat of its Waters, which rise to 117° of Fahrenheit.

was pulled down; and in digging, the Workmen discovered, about 20 Feet below the Surface of the Earth, the Remains of a Roman Bath and Sudatories, with Floors suspended on Pillars, and surrounded with tubulated Bricks, for conveying the Heat and Vapours. The Sewer which carried the waste Water into the River was entire. The Duke, having cleared the Spring and the Sewer, erected several convenient Baths upon the Spot, where Invalids are accommodated at all Hours of the Day or Night.

Here is a noble Infirmary or general Hospital for the Sick and Lame from all Parts of the Kingdom. It is 100 Feet in Front, and 90 in Depth; and was built in 1738, at the Expense of W. Pulteney, afterwards Earl of Bath. Most of the new Buildings, and by far the largest and finest Part of the City, are without the Walls. The Stranger should visit Queen Square, the Circus, North and South Parades, the Royal Crescent, St. James's Square, Lansdown Crescent, Catherine Place, Rivers Street, the Abbey Church, and the Assembly Rooms, all of which are particularly deserving his Attention.

BRISTOL.

The City of Bristol is governed by a Mayor, 12 Aldermen, 2 Sheriffs, and 28 Common Council, a Town Clerk, a Deputy Town Clerk, Chamberlain, Vice Chamberlain, Under Sheriff, &c. City Marshal, and other inferior Officers. It was erected into a Bishopric by Henry VIII. contains 17 Parishes; and, besides the Cathedral, 17 Churches and 5 Chapels, within the City; and 2 Churches and 1 Chapel in the Suburbs. It sends 2 Members to Parliament; and by a Charter, granted by Queen Elizabeth, every Man that marries a Daughter of a Citizen of Bristol becomes free of the City, and is qualified to vote for its Representatives in Parliament.

In 1777 the Abbey House in Bristol

it is not of large Dimensions, but has many Gothic Beauties: it is adorned with painted Windows and several handsome Monuments, particularly that of Mrs. Draper, the celebrated Eliza of Sterne. To the West of the Church is a most beautiful Gateway, ornamented with Statues. The Church of St. Mary's Redcliffe is considered one of the finest in the Kingdom; in it are two monumental Statues of its Founder, William Canninge; and another of Sir Wm. Penn, Father of the famous Quaker.

The Quay is one of the most commodious in Europe.

In King Street there is a very elegant Theatre; and the City Library is a handsome Stone Building. There are 13 City Companies, some of whom have neat Halls.

The Hot Well is about $1\frac{1}{2}$ M. West of the City, close by the Avon, in the County of Gloucester, at the Bottom of stupendous Precipices (Saint Vincent's Rocks, out of which the Spring rises): and above is the delightful Village of Clifton.

CAMBRIDGE

Is governed by a Mayor, High Steward, Recorder, 13 Aldermen, and 24 Common Councilmen, a Town Clerk, &c. The Police is governed jointly by the University and Corporation, the Vice-chancellor being always a Magistrate by virtue of his Office. The University, not inferior to any in the World, was first founded in the Year 630, by Sigebert, King of the East Angles; but the Colleges were not begun to be built or endowed till the Reign of Edward I. It now consists of 13 Colleges, and 4 Halls with equal Privileges with the Colleges, viz.

St. Peter's College, the first on entering the Town from London, and the most ancient, was founded in 1257. It consists of two Courts, separated by a Cloister and Gallery. The largest is 144 Feet long, and 84 broad. The lesser Court is divided by the Chapel, a fine old Building.

Corpus Christi, founded in 1350, has a mean Appearance, but con-

tains a very valuable and curious Collection of Manuscripts.

King's College, founded in 1441, by Hen. VI. was not finished till the Reign of Henry VIII. The previous Building resembles a decayed Monastery; but the new one is very magnificent, nearly 300 Feet long. The Chapel is one of the finest Pieces of Gothic Architecture in the World, 304 Feet long, 73 broad on the Outside, and 91 high, and not a single Pillar to sustain its ponderous Roof, of which it has two; the first of Stone, most curiously carved; the other of Wood, covered with Lead.

Queen's College, which stands near the River, South of King's, founded in 1448, consists of two Courts, with a fine Grove, and Gardens on both Sides of the River, connected by two wooden Bridges. It was begun by Margaret of Anjou, Wife of Hen. VI. and finished by Elizabeth Grey, the Queen of Edward IV.

Jesus College, at the east End of the Town, was originally a Benedictine Convent, and converted to its present Use in 1576.

Christ's College, opposite St. Andrew's Church, was founded in 1505, by Margaret, Mother of Henry VII.—an old and beautiful Structure.

St. John's College was founded by the same Lady in 1509, on the Site of a dissolved Priory.

Magdalen College was founded in 1519, by Edward Stafford, Duke of Buckingham.

Caius and Gonvil College, founded, 1348, by Edward Gonvil; and augmented, 1557, by Doctor Caius. It stands near the Middle of the Town, North of the Senate House.

Trinity College, founded, in 1546, by Hen. VIII. on the Site of two other Colleges, stands East of the River. It contains two large Quadrangles, and has two noble Entrances; and on the north Side a Chapel, 204 Feet long, 34 broad, and 44 high. Here is a beautiful Statue of Sir Isa. Newton, who was a Student of the College. The Hall is about 100 Feet long and 50 high. The inner Court is esteem-

ed the finest in the University. It has an elegant Cloister of Stone Pillars. On the West is the Library, an elegant Structure, 190 Feet long, 40 broad, and 38 high within. Its Entrance is by a Staircase of black Marble; and the Walls are inlaid with ancient Roman Monuments. The south End has a beautiful painted Window, of His late Majesty in his Robes. This Building was erected by Sir Christopher Wren, at the Expense of £20,000.

Emanuel College, at the S. E. End of the Town, founded, in 1584, by Sir Wm. Mildmay, was built on the Site of a Dominican Convent.

Sydney Sussex College was founded in 1598, by Lady Frances Radcliffe, Countess of Sussex. Its Hall is elegant; but the Chapel is only remarkable for standing North and South, as the others do East and West.

Clare Hall, founded, in 1326, by Richard Baden, Chancellor of the University; but, being burnt, was rebuilt in 1342, to which has been added a new Chapel.

Pembroke Hall, near Saint Peter's College, founded, in 1343, by Mary, third Wife of the Earl of Pembroke, consists of two Courts, and has an elegant Chapel built by Sir Christopher Wren.

Trinity Hall, founded, in 1350, by Bateman, Bishop of Norwich, is a small but neat Fabric.

Catharine Hall was founded, in 1475, by Robert Woodlark, Provost of Arms; its Front is the most extensive and regular in the University.

Downing College, now building, was founded 22d September 1800, by Sir G. Downing, of Gamlingay Park, in Cambridgeshire. The first Stone of this College was laid on the 18th of May 1807. At present but a small Portion of the Building is erected, to which is allotted a Piece of Ground of nearly 30 Acres. It will consist of a Master, 2 Professors (one of the Laws of England and one of Medicine), 16 Fellows (only two of whom are to be clerical), and 6 Scholars. For farther Particulars of this Found-

ation see Deighton's Cambridge University Calendar.

The Senate House of the University is an elegant Building, of the Corinthian Order. North of the Philosophy School is the Repository of Dr. Woodward's extraneous Fossils, Ores, Shells, &c. At the Corner of this Building is an elegant geometrical Stone Staircase, leading to the old Library, which opens into two other Rooms, containing 30,000 Volumes, presented by George I.

In the Market Place, fronting the Shire Hall, stands Hobson's Conduit, always supplied with running Water. This was the Gift of the celebrated Hobson, the Carrier, in the Reign of James I. who gave rise to the proverbial Expression of "Hobson's Choice, this or none," by letting out Horses to the Students in such Rotation, that they had an equal Share of Rest and Work, by resolutely refusing to let any other than that which stood next the Door.

CANTERBURY,

The Capital of the County of Kent, contains 16 Parishes, and is the Primate's See. The Britons named it *Caer Kent*; that is, the City of Kent. It is called the City and County of the City of Canterbury, governed by a Mayor, Recorder, 12 Aldermen, 24 Common Councilmen, with a Sheriff and Coroner, and 4 Serjeants at Mace.

The Magistrates have Authority to try capital Offences within their Liberty, the Mayor sitting as Judge, assisted by the Recorder, who pronounces the Sentence.

The Cathedral has several Times been destroyed by Fire; the present Structure was built about the Year 1174, but not entirely completed till the Reign of Hen. V. Kings, Princes, Cardinals, and Bishops, are buried in it. During the great Rebellion it suffered much; Cromwell made a Stable of it for his Dragoons; but after the Restoration it was repaired. The Body of the Church measures 178 Feet from the western Door to the

Choir Steps; the Breadth, including the Aisles, 71 Feet; and the vaulted Roof 80 Feet. The Choir is the most spacious of any in the Kingdom, being 180 Feet in Length from the western Door to the Altar. The Altarpiece was designed by Sir James Burrough, Master of Caius College, Cambridge; and the great stained Window is the most beautiful of the Kind in England. Behind the Altar is the beautiful Chapel of the Holy Trinity, in the Middle of which stood the Shrine of Thomas à Becket; Part of the Flat is curiously inlaid with Mosaic Work, and contains the episcopal Chair, composed of three Pieces of grey Marble. In the Mint Yard, within the Precincts of this Church, is a public Grammar School, founded by Henry VIII. Over Westgate is the City Prison; and in Saint Dunstan's Street Without is the Prison for the eastern Part of Kent; where also the Jews have a Synagogue. Canterbury has sent Members to Parliament ever since the Reign of Edward I. Dunge Hill, at the End of the Town, is now converted into the City Mall; it forms a most beautiful Terrace, planted and made at the Expense of the late Alderman Simmons, of Canterbury.

DOVER

Was formerly surrounded with a Wall, and was incorporated by Edward the Confessor, by the Style of a Mayor and Commonalty. The Townsmen were called Burgesses, from among whom the Mayor chose Jurats or Assistants, Officers common to all the Cinque Ports.

It was formerly divided into 21 Wards, but they are now reduced to 13.

The Mayor is annually chosen on the 8th of September, and is Coroner for the Town and its Members, Faversham and Folkestone. The Town Hall is ornamented with several good Portraits. There are also a neat Assembly Room and a Theatre.

Dover is celebrated in History as a Place of the greatest Importance, ever since the Norman Conquest; and has often been called the Lock and Key

of the whole Realm. Its ancient Castle is by some supposed to have been built by Julius Cæsar; others imagine that Claudius was the Founder. Henry II. about 1153, is said to have inclosed it with a new Wall. The present Entrance is on the S. Side of the main Tower, by a grand Flight of Steps round the eastern Side to the third Story, or the Governor's Apartments. These Steps were secured by three strong Gates, at each of which were a Chamber or Guard Room, and a Dungeon for Prisoners, in which several Persons of Distinction have been confined at different Times, but now used only for disorderly Soldiers. Without the Duke of Suffolk's Gate are commodious Barracks, and deep Wells which supply the Garrison with Water.

Near the Edge of the Cliff is a beautiful Piece of Brass Ordnance, 24 Feet long, cast at Utrecht in 1544, called Queen Anne's Pocket Pistol, finely ornamented with Figures in Bas Relief: it was a Present from the States of Holland to the Queen, and is said to be capable of carrying a 12-pound Shot to the Distance of 7 Miles.

LIVERPOOL,

Situated on an Estuary of the R. Mersey, about six Miles from the Irish Channel, is a Borough, governed by the Corporation, consisting of a Common Council of 41 Persons, out of whom a Mayor and 2 Bailiffs are annually chosen by the free Burgesses. They are assisted in their legal Capacity by a Recorder and 1 Town Clerk. Those who have served the Office of Mayor are styled Aldermen, the three junior being Coroners. The Corporation Income amounts to about £80,000 per Annum. The whole Town is comprised in one Parish, which causes the Office of Churchwarden to be one of great Trust, as a Sum of £70,000 passes through his Hands in the Course of the Year.

The Inhabitants, including the Villages of Everton, Edgehill, and

Toxteth Park, are stated at 120,000, being more than double the Estimate of the Year 1790, and ten Times that of 1730. The new Streets are broad and spacious, and the old ones have recently been widened to a very great Extent: they are all lighted with Gas. There are 21 Churches of the Establishment, of which that just erected for the School for the Blind stands unrivalled for simple Beauty; and, it should be added, is the Work of a native Architect. The Chapels for the different Denominations of Dissenters are very numerous. Of the elegant Buildings which adorn this public-spirited Town, we shall only name a few. The splendid Exchange Buildings, composing three Parts of a Quadrangle, were erected at an Expence of above £100,000, which was subscribed within twenty-four Hours, and are admired as a brilliant Specimen of Grecian Architecture. The Area to which they front is the largest in Europe, being 197 Feet by 178, and is ornamented with a beautiful Bronze monumental Group, by Westmacott, to the Memory of the immortal Nelson, at the Expence of £9000, collected from Individuals. In the East Wing of the Building is the News-room, 94 Feet by 52, and over it the elegant New Lloyd's, or Underwriters' Room. The Town Hall, which cost originally about the same Sum, and upon which £60,000 has since been expended, forms the fourth Side of the Square, and is embellished with a majestic Dome, crowned by the Figure of Britannia. The Interior is fitted up in a sumptuous Style, as entertaining Rooms for the Chief Magistrate: the superb Ball Room is 90 Feet by 42 Feet, the Ceiling of which is extremely elegant. The Vestibule is embellished with a full-length Portrait of our Sovereign, presented by him when, as Prince of Wales, he honoured Liverpool with a Visit. The new Gaol; the Lyceum, Athenæum, and Union News Rooms and Libraries; the Liverpool Royal Institution, in which a

lic Lectures occasionally are delivered; the Corn Exchange; Theatre; Music Hall; and Wellington Assembly Rooms, merit the Attention of the Traveller. The charitable Institutions are: the admirable Asylum for the Blind, carried on at an annual Expence of £4000, by Subscription; the Infirmary; the Dispensary; the Blue-coat Hospital; the Merchant Seamen's Hospital; the Fever Ward and House of Industry; the Ladies' Charity for Women in Child-bed; the Strangers' Friend Society; the Female School of Industry; Moorfields School; the benevolent Societies of St. Patrick and St. David; the Marine Society; the Theatrical Fund; and many friendly Societies among the Tradesmen.

But the most remarkable Feature in the Port of Liverpool, and for which it is distinguished from all other great Ports in the Kingdom, is the Convenience in the Construction and Arrangements of its Docks, which are so commodious, that, after a few Hours, occupied in passing the Entries at the Custom House, on the Arrival of a Vessel, her Cargo may be landed on the Quay, and not unfrequently within 40 or 50 Yards of the Stores of the Consignee. There are now complete 12 Docks or Basins, besides 5 Graving Docks, affording Quay Room to the Extent of 4 Miles, 5 Furlongs, and 37 Yards; upon one of which there is a Parade, at the Edge of the River, 700 Yards in Length, and affording a complete View of every Vessel entering or leaving the Port. The following will show the rapid Increase of the Trade, the Year ending 30th June:

In 1813, 5341 Vessels, 547,426 Tons, 50,177*l.* 13*s.* 2*d.* Dock Duties paid;

In 1819, 7849 Vessels, 867,318 Tons, 110,127*l.* 1*s.* 8*d.* Dock Duties paid:

Of which 2300 to 2500 were Cargoes of Grain and Provisions from Ireland.

In 1814, 1 Vessel sailed for the East Indies, measuring 512 Tons.

In 1818. 22 Vessels sailed for the

To give some Idea of the vast Extent of Commerce here, we shall only notice the Import of Cotton for 1818, was 423,942 Bags, being nearly twice the Quantity imported into every other Part of Great Britain, including the Metropolis. Liverpool has Water Conveyance to its Twin-sister, Manchester, by two Canals; and so great is the Intercourse between the two Towns, that there are two Mails, and Stage Coaches almost every Half-hour, to the latter Place, daily.

The Objection which has long existed to Strangers crossing the broad River which divides it from Cheshire, is now completely removed by the Establishment of excellent Steam Vessels, so contrived as to take with Ease and Expedition every Description of Carriages; and, at the opposite Ferry of Birkenhead, a magnificent Hotel has been erected, provided with hot and cold Shower and Plunge Baths, and every other Accommodation for Bathers.

OXFORD.

The City of Oxford is seated at the Confluence of the Rivers Isis and Cherwell; and its Beauty, in magnificent Buildings, is unequalled.

The University consists of 20 Colleges and 5 Halls.—I. Baliol College, founded in 1269, by Sir John Baliol, of Bernard Castle, Father of John Baliol, King of Scotland; mostly rebuilt in the Reigns of Henry VI. and VII. It consists of a Master, 12 Fellows, 14 Scholars, and 13 Exhibitioners. The Entrance into the Court is by a handsome Gothic Gateway, on the north Side of which stands the Chapel, adorned with many beautiful Paintings on Glass; and a new Building has of late been added to the south-west Angle, through the Munificence of the Rev. Wm. Fisher, late Fellow of this College.

II. Merton College, erected, in 1267, by Walter de Merton, Bishop of Rochester and Lord Chancellor of England, being transferred from the College at Merton, in Surrey; it con-

sists of a Warden, 24 Fellows, and 14 Postmasters. The Chapel, which is also the Parish Church of Saint John's, is a handsome Gothic Edifice. South of this Chapel is a small old Quadrangle, Part of which forms the Library, and contains many curious Manuscripts.

III. University College. This is supposed to have been the principal College or Hall founded by Alfred; but was chiefly restored by William, Archdeacon of Durham, who left a considerable Legacy thereto in 1249; as well as by the Contribution of Walter Shirlaw, Bishop of Durham, and Hen. Percy, Earl of Northumberland: it consists now of a Master, 12 Fellows, and 17 Scholars. It has been greatly enlarged by the Benefaction of Dr. John Radcliff, and has Chambers for 2 Fellows, Students in Medicine, who have a handsome Salary for ten Years; Half of which Time they are to travel beyond Seas for Improvement. In the common Room is a Marble Bust of K. Alfred, by Wilton, reckoned one of the best Pieces of modern Sculpture in the University.

IV. Exeter College, founded, in 1314, by Walter Stapledon, Bishop of Exeter: it consists of a Rector, 25 Fellows, 1 Scholar, and 2 Exhibitioners, principally elected out of the Diocese of Exeter.

V. Oriel College, founded, in 1324, by Adam de Brome, Almoner to Edward II.: a Tenement called L'Orielle, or Le Orielle, was given to it by Edward III. from whence it is supposed to have taken its Name. It maintains a Provost, 18 Fellows, and 13 Exhibitioners; and the whole Number of Students is about 140.

VI. Queen's College, founded, in 1340, by Robert de Eglesfield, Chaplain to Queen Philippa, Consort of Edward III. The present Edifice was begun in 1672, by Sir Joseph Williamson, Knt. and finished by the handsome Legacy of Mr. Mitchell, of Richmond, who founded 8 additional Fellowships, 4 Scholarships, and 4 Exhibitions, in this College the Members are, a Provost, 24 Fel-

lows, &c. and the whole Number of Students amounts to about 100.

VII. New College, or Winchester College, was founded, in 1379, by the great William of Wykeham, and endowed for a Warden and 70 Fellows. The Chapel is far superior to any other in the University. The Antechamber is supported by two Pillars of fine Proportions. The Entrance to the Choir is by a beautiful Gothic Screen, 100 Feet long, 35 broad, and 65 high. The Approach to the Altar is by a noble Flight of Marble Steps. The Communion Table is enclosed by a handsome Iron Rail-work, and covered with a Pall of Crimson Velvet. The Stalls are remarkably elegant, in the light Gothic Style. The Windows of the Antechapel contain the Portraits of the Patriarchs, Prophets, and Saints, as large as Life, to the Number of 64, and 50 smaller above them. The West Window is divided into two Ranges; the lower having seven Compartments, each near 3 Feet wide and 12 high, with Representations of Temperance, Fortitude, Faith, Hope, Justice, Prudence, and Charity; over them, in a Space, 10 Feet wide and 18 high, is represented the Nativity of our Saviour; and the Portraits of the two Artists, Sir Joshua Reynolds and Mr. Jarvis, are introduced as Shepherds paying adoration to the newborn Infant. The Windows on the North Side of the Chapel contain, in the lower Range, the chief Persons recorded in the Old Testament; and, in the upper, the 12 Apostles. The two other Windows are filled with Pictures of our Saviour, the Virgin Mary, and the 12 Apostles. The Windows on the South Side of the Chapel, representing various Saints and Martyrs, were painted by Price, in 1740. In this Chapel is shown the Crosier of the Founder, almost the only one of the Kind remaining in the Kingdom: it is of Silver, gilt, near 7 Feet high, ornamented with Figures of Angels, and the tutelar Saints of the Cathedral of Winchester.

VIII. Trinity College was founded by Sir Thomas Pope, in 1594, on the

Site of a College erected by the Prior and Monks of Durham. It consists of a President, 12 Fellows, and 12 Scholars. Dr. Bathurst, President of this College, rebuilt the beautiful Chapel, in 1694; and it contains an excellent Library.

IX. Lincoln College, founded by Richard Fleming, Bishop of Lincoln, who obtained a License of Henry VI. in 1427, to make All Saints Church collegiate, and to found a College for a Rector and 7 Scholars; it was finished in 1475, by Rotherham, Bishop of Lincoln, afterwards Archbishop of York, and now consists of a Rector, 12 Fellows, &c. The Chapel was erected in 1632; the Windows are of painted Glass. The Roof consists of Compartments of Cedar, embellished with the Arms of the different Founders. There are 8 Figures of Cedar representing Moses, Aaron, the four Evangelists, St. Peter, and St. Paul, placed at each End of the Reading Desk.

X. Worcester College, founded in 1714, by Sir Thos. Coke, of Bentley, in Worcestershire, consists of a Provost, 20 Fellows, 17 Scholars, &c. It was originally called Gloucester College, being a Seminary for educating the Novices of Gloucester Monastery; and, at the Reformation, was converted into a Palace for the Bishop of Oxford.

XI. St. John's College was founded, 1557, by Sir Thos. White, Alderman of London, on the Site of Saint Bernard's College, for a President, 50 Fellows, 2 Chaplains, 2 Clerks, 6 Choristers, &c. It consists of two Courts: in the first are the Chapel and Hall on the North, and the President's Chambers on the East. The Chapel has a handsome Screen and Altar, and over the Communion Table is a beautiful Piece of Tapestry. The Choir Service is here performed in the Evening only. On the North Wall of this Chapel is a marble Urn, containing the Heart of Dr. Rawlinson, enclosed in a Silver Vessel. On the East and the West Side of the second Court is a beautiful

Doric Colonnade, the Columns being made of a remarkable Stone, said to be dug at Fifeild, in Berks; in the Centre of each are Porticoes, having a Profusion of Embellishments; over these, on each Side, are two good Statues, in Brass, of Charles I. and his Queen. The upper Stories of the South and East Side form the Library, the Window of which has several curious Paintings in Glass. The second Court was mostly erected by Dr. (afterwards Archbishop) Laud, in 1595, from the Materials of a Carmelite Friary on Gloucester Green.

XII. All Souls College, founded in 1438, by Hen. Chicheley, Archbishop of Canterbury, for a Warden and 40 Fellows, besides 2 Chaplains, 9 Clerks, and Choristers. The Chapel is a stately Pile, and the Antechapel, containing several remarkable Monuments, is 70 Feet long and 30 broad. The Entrance to the inner Chapel is by a grand Flight of Marble Steps, through a Screen constructed by Sir Christopher Wren. On each Side of the Altar are two Vases, representing, in Bas Relief, the Institution of the two Sacraments. Between the Windows are various Saints, in Chiaro-scuro; and it has a noble Library. There is a curious Ceremony performed at this College annually, on the 14th of January, called "The Mallard Night," being the Commemoration of the Discovery of a Mallard of extraordinary Size, in a Drain, when digging the Foundation. An elegant Entertainment is provided in the Evening, and a merry old Song is always sung, set to ancient Music.

XIII. Magdalen College, founded, in 1458, by William of Wainfleet, Bishop of Winchester, for a President, 40 Fellows, 30 Scholars, &c. It is adorned with the Figures of the Founder, William of Wykeham, St. Mary Magdalen, Henry III. and St. John the Baptist. In the West Window of the Antechapel are some Remains of painted Glass; and the Remains of the Chapel contain the Representa-

tion of Apostles, Saints, &c. The Altar-piece is a beautiful Representation of the Last Judgment; and, underneath, a Painting, supposed to be by Guido, of Christ bearing the Cross. Through the Centre of the Building is the Entrance to a beautiful Lawn.

XIV. Brazen Nose College, founded, in 1509, by Wm. Smith, Bishop of Lincoln, and Rich. Sutton, Knt. of Presbury, in Cheshire, for a Principal and 15 Fellows. The present Establishment is 5 Fellows, 32 Scholars, and 12 Exhibitioners. In the Centre of the first Quadrangle are Statues of Cain and Abel. The East Window of the Chapel contains some good painted Glass, by Pearson.

XV. Corpus Christi College, founded, in 1516, by Bishop Fox, Lord Privy Seal to Henry VII. and VIII. It has a well-furnished Library, and a curious Collection of Pamphlets, Manuscripts, &c. The Crosier of the Founder is here shown; but it is not so curious as that of Wykeham, at New College. The present Members of this Society are a President, 20 Fellows, 2 Chaplains, 20 Scholars, 4 Exhibitioners, and 6 Gentlemen Commoners.

XVI. Christchurch, founded by Cardinal Wolsey, in 1525; but, in 1529, when he fell into Disgrace, Henry VIII. seized on the Foundation, and suspended it for three Years, when he re-established it under his own Name, and in 1546 translated the episcopal See hither from Oseney; and the Church of St. Frideswide was constituted a Cathedral, by the Name of Christ's Church. This Foundation has remained in the same Form ever since, except that Queen Elizabeth converted the Grammar Scholars into Students, and ordained that their Vacancies should be supplied from Westminster School. It consists of a Dean, 8 Canons, 100 Students, 8 Chaplains, 8 Singing Men, 8 Choristers, a Schoolmaster, Organist, &c. The Building contains 4 Quadrangles, the Front extending 382 Feet, and terminates at each End with two corresponding Turrets; in the Centre is the grand

Entrance, a most magnificent Gothic Building, having a beautiful Tower, which contains the Bell called Great Tom, on the Sound of which, every Night at Nine, the Students of the University are enjoined, by Statute to repair to their respective Societies. The grand Quadrangle is 264 Feet by 261 in the Clear, the East and North Sides of which contain the Chambers of the Dean and 4 of the Canons; and the greater Part of the South Side is formed by the Hall, the Entrance to which, by a stately Staircase of Stone, is 180 Feet in Length, and 80 high. It is ornamented with the Portraits of most of the eminent Men who have been educated at this College. The Roof is a noble Frame of Rafter-work, beautified with about 300 Coats of Arms, properly blazoned. Round the whole Area of the grand Quadrangle is a spacious Terrace, and in the Centre a Basin and Fountain, with a Statue of Mercury. Over the grand Entrance is a Statue of Queen Anne; over the Arch in the N. E. Angle, one of Bishop Fell; and opposite, on the S. E. one of Cardinal Wolsey. The Church towards the East of the grand Quadrangle is the Cathedral, formerly the Church of St. Frideswide's Monastery, erected in 1200, on the Site of which Monastery the College was built: several of the Windows contain beautiful Specimens of painted Glass, which were collected from the Wreck of the Civil Wars. At the West End of the North Aisle is the Painting of St. Peter delivered out of Prison, executed in 1720, by John Oliver, in his 80th Year. The Tower contains ten Bells, which, together with that called Great Tom, were brought from Oseney Abbey. Peckwater Court, founded by Dr. Radcliffe, consists of three uniform Sides, each having 15 Windows in Front, and is perhaps the most elegant Edifice in the University. On the front Side of this Court is a magnificent Library, supported by Corinthian Pillars; but what was originally intended to be a Piazza, has been altered, for the more

convenient Reception of Gen. Guise's Collection of Paintings, and the great Collection of Books belonging to the College. East of this stands Canterbury Court, formerly a distinct College, which has lately been handsomely rebuilt.

XVII. Jesus College, founded, in 1571, by Queen Elizabeth; and endowed by Hugh Price, Treasurer of St. David's, for a Principal, 8 Fellows, and 8 Scholars; which has since been raised to 19 Fellows and 18 Scholars, besides Exhibitioners.

XVIII. Wadham College, founded, in 1613, according to the Will of Nicholas Wadham, of Merryfield, in Somerset, for a Warden, 15 Fellows, 15 Scholars, 2 Chaplains, and 2 Clerks. In the East Window of the Chapel is a fine Painting of the Passion of our Saviour; and at the lower Part of the Altar is a singular and curious Painting on Cloth.

XIX. Pembroke College, founded, in 1620, by Thos. Tesdale, of Glympton, in Oxfordshire; and Rich. Wightwick, Rector of Ilsley, Berks. It was originally Broadgate Hall, and received its present Name from the Earl of Pembroke, who was Chancellor of the University at the Time the College was founded.

XX. Hertford College. This is now dissolved by Act of Parliament, and the Building transferred for the future Occupation of the Society of Magdalen Hall, which is to be pulled down.

Halls. I. Alban Hall is contiguous to Merton College, erected by Robt. de St. Alban, a Citizen of Oxford.

II. St. Edmund's Hall, situate to the East of Queen's College, established in the Reign of Edward III. and consigned to Queen's College in 1557.

III. St. Mary Hall, originally the Parsonage-house of the Rectors of St. Mary, which being appropriated by Edward III. to Oriel College, the House also came into their Possession.

IV. New Inn Hall was granted to Students by John Frillock, Bishop of Hereford, in 1545.

V. Magdalen Hall, situate West of Magdalen College: the greater Part of it is the Grammar School for the Choristers of Magdalen College, and was erected for that Purpose only by William of Wainfleet; but, other Buildings being added, it grew by Degrees into an academical Hall.

Among the other public Buildings worthy of Notice are the following Churches—All Saints, St. Peter's, and St. Mary's. The other public Buildings are the Theatre, which was built at the Expense of Archbishop Sheldon, in 1668, and is a magnificent Edifice, in the Form of a Roman Theatre, not circular, but flat on one Side; and the Roof, 90 Feet by 70,

rests on the Walls, without Pillars. Ashmole's Museum, a Repository of natural and artificial Curiosities; the Clarendon Printing-house; Bodleian Library; Radcliffe Library; and the Astronomical Observatory.

The City and University send each 2 Members to Parliament. The University is governed by a Chancellor, Vice-chancellor, 2 Proctors, a Public Orator, 3 Esquire Beadles, and 3 Yeoman Beadles.

The Corporation of Oxford consists of a Mayor, High Steward, Recorder, 4 Aldermen, 8 Assistants, 2 Bailiffs, a Town Clerk, 2 Chamberlains, and 24 Common Councilmen.

From Barnet to South Mims an extensive Improvement is contemplated by the Parliamentary Commissioners (see Mr. Telford's Report to the House of Commons, 5th June 1820, p. 9). At present the Road is composed of a Series of angular Turnings and Hills, which render it surprising that such glaring Imperfections should have been so long suffered, when a Line with Inclinations not exceeding 1 in 30 might easily be made.

Ridge Hill. The Line of Road over this Hill has been recently improved, and is now more direct and easy.

St. Albans. Two Plans have been made for improving the Road thro' this Town (see Mr. Telford's Report, June 5th, 1820, p. 9): one passes from the Market Place along the eastern Side of the Valley; the other on the western Side of the great Church; both sufficiently easy.

West of Hockliffe, the inconveniently steep Hills on the old Road have been cut down, the Valleys raised, and the Road made of a proper Width, Shape, and of a hard, smooth Surface.

6th Milestone, on r. see at Southgate, Minchendon House, the Marquis of Buckingham. Between 7th and 8th Milestones, on r. at Southgate, a Seat of — Scott, Esq. of which you have again a fine View at Whetstone.

8th Milestone, on r. see Seats of Tho. Collins, & — Downes, Esqs.: on l. — Andrews, D. Bacou, and J. W. Bacou, Esqs.: a little further on the Road, on r. — Jellicoe, Esq.

Between 8th and 9th Milestones, about 1 m. on l. Gen. Maitland; close to the Road, — Harrison, Esq.: on r. — Mountain, Esq.

Between *Barnet Pillar* and *South Mims*, on r. is Dancer's Hill, lately G. Ellis, Esq.; 1 m. on the l. of Dancer's Hill is Russia Cottage, — Jennings, Esq.

South Mims, a little before, on r. Mrs. Vincent. Entrance of *S. Mims*, on r. is North Mims, Henry Browne, Esq.

Ridge Hill, on r. Shenley Parsonage, Rev. T. Newcome.

Colney, on r. see Titchenger, Earl of Hardwicke. From *Colney Bridge* see on l. Colney Chapel and Park, Pat. Hadow, Esq. $\frac{1}{2}$ m. beyond *Colney*, on l. see Porters, Luke White, Esq.; near the 20th Milestone, $\frac{1}{2}$ m. on l. St. Julians, — Howard, Esq. Just before *St. Albans*, on l. see St. Stephens, Miss Sheffield.

St. Albans is celebrated as being the Verulam of the Romans; but its present Name is derived from a magnificent Monastery, founded, in the 8th Century, in honour of St. Alban. The Town consists of three principal Streets, and is divided into three Parishes. The Church belonging to St. Alban's Parish is a very ancient Structure: it is 600 Feet in Length by 174, in the extreme Dimensions of the Transept. On the south Side 17 Statues of Kings occupy Niches; and it contains numerous Monuments and Inscriptions. The celebrated Lord Bacon was interred in St. Michael's Church, where a black Marble Statue of him was erected by his Secretary. Two Battles were fought in the Neighbourhood, between the Adherents of the Houses of York and Lancaster, in the Years 1451 and 1461. It is a Borough Town, and returns two Members to Parliament.

At *St. Albans* is Holywell House, — Read, Esq. 2 m. from *St. Albans*, on l. Gorhambury, Earl Verulam.

Markyate Street, near, on r. Markyate Cell, the late Joseph Howell, Esq.; 2 m. on l. is Beachwood, Sir John Sebright, Bart.

Daventry is situate near the Sources
of the Rivers Avon and Nen; is an
ancient Borough, having been in-
corporated by a Charter of King
John, which was renewed by Queen
Elizabeth; but it has not the Pri-
vilege of returning Members to

Parliament. Here was formerly a
Priory, founded in 1090, of which
some small Remains are still to be
seen. In the Neighbourhood is an
extensive Roman Encampment, on
the Summit of Borough Hill, call-
ed Danes Hill; it is defended by
several Ramparts and Ditches.

Coventry, in Conjunction with cer-
tain adjacent Villages, constitutes
a County of itself. The Streets
are in general narrow, and the
Houses are principally very old,
the upper Parts greatly project-
ing; many have undergone little
Change since their Erection in the
15th and 16th Centuries. There
are three Churches; that of St.
Michael's is a beautiful Specimen
of the pointed Style; its fine
Tower and Spire form one of the
principal Ornaments of the City.
The Tower, 136 Feet high, is su-
perbly enriched with Embroidery
Work and embossed Decorations.
St. Mary's Hall, erected in the
Reign of Henry VI. as a Place of
Meeting for the Trinity Guild, is
esteemed one of the most interest-

Coventry. The long, narrow Streets of this Town are so inconvenient and dangerous, as a great public Thoroughfare, that the Parliamentary Commissioners have got a Plan made for a new Line, passing immediately on the south Side of the Town; which, with a similar Change near the Village of *Alley*, will make the Line of Road both straight and level, and sufficiently accommodate the Town.—See Mr. Telford's Report, June 5th, 1820.

Birmingham—This Town, standing upon an isolated Hill, creates inconveniently steep Approaches by the present Road; this glaring Defect has led the Commissioners to have sundry Surveys made (see Mr. Telford's Report, June 5, 1820), and a convenient Line has been obtained from Small Heath Toll Bar, by the Bottom of Coleshill Street, which is the best Entrance from Coventry; and the Mail Road may proceed thence towards *Soho*, avoiding two Hills. This Line must either take place, or a more direct Road will be made between Stone Bridge and Wolverhampton. From *Bromwich Heath* the Circuitous and Hilliness of the old Road, by

Window is a very curious Piece of Tapestry, representing Henry VI. with Queen Margaret, and various Persons of their Court. The principal Manufactures at present are those of Ribands and Watches: in the Year 1808 there were 2819 Silk and Riband Looms in the City.

Coventry returns two Members to Parliament; and has a Free School, founded in the Reign of Hen. VIII.

Birmingham, Entrance of, on the l. Bordesley Hall, John Taylor, Esq.

Birmingham is situate on a Declivity of the River Rea; and, including the Hamlets of Deretend and Bordesley, extends nearly two Miles in Length. It is compressed in one Parish, but contains three Churches. St. Philip's, commonly called the New Church, is a beautiful Building, erected in 1771, at a great Expense, and capable of containing 2000 Persons. There are various charitable Institutions, conducted upon a liberal Scale; amongst others, that for the Relief of deaf and dumb Children is particularly deserving of Attention: upwards of thirty Children are maintained in this Institution. This Town is justly celebrated for the Variety and Ingenuity of its Manufactures, and for the many complicated Pieces of Machinery, which have been adopted for abridging Labour. In 1788 a coining Mill was erected, which

has been since improved so as to work eight Machines, and is now capable of striking between 30 and 40,000 Pieces of Money in an Hour. The Manufacture of Fire Arms was formerly a very considerable Branch of the Trade of this Town; during the last War, 14,500 Muskets were delivered per Week into the Ordnance Office. Buttons of all Descriptions are also fabricated here; and it is said, that, at the Pin Works, 12,000 Pins can be cut and pointed in an Hour; and, at the same Time, 50,000 Pin Heads can be made from the Wire. Vast Quantities of Toys are likewise manufactured; and human Industry is turned to such an Account, that not only a great Number of Women find Employment, but Children at a very early Age can assist in some of the Operations.

Birmingham Canal. This Navigation commences at the Town of Birmingham; its Course from thence is by Smithwick, Oldbury (near which it has a Branch to Wednesbury), Tipton Green (where it is joined by the Old Dudley Extension), Bilston, near to Wolverhampton (where it unites with the Wyrley and Essington Canal), to Atherley, at which Place it joins the Staffordshire and Worcester-shire Canal.—Length of the direct Line 22½ m.; Branches, 5½ m.

Wednesbury, a considerable Market Town, of great Antiquity, is distinguished for its numerous and valuable Manufactures; the principal of which are Guns, Coach Harness, Saws, Edge Tools, Nails, Wood Screws, and cast Iron Works of every Description; Enamel Paintings, in the first Style of Execution, are likewise among its prominent Productions. The Abundance and superior Quality of the Coal found here tend much to the Proficiency of the different Branches of Manufacture, being the best in the Kingdom for the Smith's Forge. Here is found that peculiar Species of Iron Ore denominated Blond Metal. Some Spots likewise abound with a red Earth, employed in glazing Vessels, known by the Appellation of Hip. The Church is an elegant Gothic Structure, in the pointed Style of Architecture, supposed to be built in the eighth Century: at one End rises a handsome Tower, supporting a lofty Spire of unusual Beauty.

Wolverhampton, by far the most populous Town in Staffordshire, is a Place of great Antiquity, well built, healthy, and on a lofty Situation. The Trade which it carries on in Locks, Keys, and similar Articles, is truly astonishing. The Manufacture of enamelled Goods is also very considerable. The Parish is of great Extent, containing 17 considerable Villages and Townships. The *Staffordshire and Worcestershire Grand Trunk Canal*, and the *Birmingham Canal*, form a Junction to the North. It has two Churches: St. Peter's collegiate Church is very finely situated on elevated Ground, and has a lofty Gothic Tower, embellished with Battlements and richly ornamented; the Nave is supported by five pointed Arches, resting on octagonal Pillars. The Pulpit, which is made of Stone, is an Object of great Interest and Curiosity. St. John's Church, built by Subscription, and finished in a plain

neat Manner, is pewed and painted according to the Taste of modern Times. The Country around presents a Scene of great Luxuriance.

Shrewsbury—The Approaches to and Streets of this Town are steep, crooked, and dangerously inconvenient: sundry valuable Improvements projected.

From Shrewsbury to Shelton the present Road is narrow, crooked, and hilly. The Parliamentary Commissioners have had Surveys made for a complete Improvement, suitable to the Importance of this Road.

Montford Bridge.—It is intended to ease this Hill by cutting, widening, embanking, and removing the Road near the Bottom of the Hill: Between Montford Bridge and Oswestry, and from thence to Chirk Village, various Improvements have been made in the Road, by removing Mud Banks, widening, cutting off the sharp Bends, and reconstructing the Surface of the Road. At the Queen's Head a Turnpike Road passes thro' Whittington to Gobowen, which is one Mile shorter than through Oswestry, and less hilly.

Atcham, near, on the r. is Attingham House, Lord Berwick.

1 M. beyond *Atcham*, on r. Rob. Burton, jun. Esq.; near $\frac{1}{2}$ M. further on r. is Longnor, Robert Burton, Esq.

Shrewsbury is nearly in the Centre of the County of which it is the Capital, and is celebrated for the Beauty of its Situation and Prospects. The Interior of the Town by no means corresponds with its external Beauties. The Streets are steep, narrow, and indifferently paved. Of the Castle but little now remains. The Abbey Church presents few Features of its ancient Grandeur: the Interior has an Air of majestic Simplicity. The collegiate Church of St. Mary is a large venerable Building, in the Form of a Cross; the Exterior exhibits various Styles of Architecture; its lofty and beautiful Spire forms a conspicuous Object of Ornament to the Town. St. Julian's Church is a tasteful modern Structure; the East Window is filled with fine painted Glass. In 1785 a handsome County Hall was erected; and in 1793 a County Gaol, after the Plan of Howard. Near St. Chad's Church, on the Banks of the Severn, is a delightful Promenade, Saint Chad's Walk, which is much frequented, particularly on Sundays. In 1400 took place the celebrated Battle of Shrewsbury, between Hotspur and Henry IV.

The *Chester & Ellesmere Canal* unites with the Montgomerysh. Canal near Llanymynech, passes near Ellesmere, Wrenbury, Acton, Waverton, joins the Dee at Chester, and then passes North to Ellesmere Port, where it unites with the R. Mersey. It has two Branches: one passing in a N. W. Direction to the River Dee at Llantisilio, in the Vale of Llangollen, which is its Summit, and from whence it is supplied: the other Branch, which was intended to join the Severn at Shrewsbury, is only in Part executed. There are also Cuts near Prees and Wem, also to Whitchurch.—Length, 100 M.

Oswestry, near, is Porkington, Wm. Ormsby Gore, Esq.; opposite is Mount Sion, L. D. Griffith, Esq.; near which is Pentrepant Hall, the Hon. F. West: 2 M. to l. is Sweeney Hall, T. N. Parker, Esq.; and at Aston, W. Lloyd, Esq.

Oswestry is a Market Town, pleasantly situate on an Eminence. This Place was much harassed during the Couquest of Wales by Edward I.; and, during the Barons' War, King John set fire to the Town: it was soon afterwards rebuilt, and again destroyed by Llewellyn, in 1233. The Church is an extensive Building; and there is a free Grammar School.

1 M. beyond *Oswestry*, on r. is Park, C. Kinchant, Esq.; $2\frac{1}{2}$ M. beyond, on r. Belmont, J. V. Lovett, Esq.

Chirk is celebrated for its picturesque and beautiful Scenery. The Aqueducts of the Ellesmere Canal, near this Place, conducted over two Ravines, through one of which flows the impetuous Dee, are regarded as admirable Specimens of mechanical Ingenuity.

It being evident, in passing through Chirk, that Oswestry and Shrewsbury lie considerably South of a direct Line, the Commissioners had the Country surveyed, from which it appears that about Six Miles might be saved by crossing direct from Chirk to Wellington.

Near Whitehurst Gate a very advantageous Improvement has been made, by which sundry steep Hills have been avoided, and the Line shortened Half a Mile.

At the Town of Llangollen a direct and commodious Passage has superseded the Necessity of passing the narrow and crooked Streets.

Between Llangollen and Corwen all the steep and dangerous Hills have been avoided, and an easy, smooth, broad, and well-protected Road has been made.

Beyond Corwen the Road has been generally improved; but the most important Alterations are the one on the Banks of the R. Gairw. including the romantic Pass of Glendyffws, and that at Cerrig y Druidion.

From Cernioge, past Bettws, Capel Curig, and Ogwen Lake, a broad, smooth, and well-protected Road has been made along the rocky Precipices, with which that magnificent mountain Scenery abounds.

From Ogwen Lake the same perfect Kind of Road-making is continued down the Valley of Ogwen to the City of Bangor, the Approach to which is now very perfect.

From Bangor the New Road finds its Way through a low Pass in the adjacent Ridge, and descends gently along the Face of the sloping Bank to the great Bridge: the Road is very smooth and well-protected, and commands a fine View of the magnificent Scenery.

Menai Bridge—The main Opening of the Bridge, substituted for the inconvenient Ferry, is 560 Feet between the Points of Suspension. the Roadway is 30 Feet broad and 100 Feet above the Level of high Water spring Tides.

Peacock; a magnificent Column to the Marquis of Anglesea; and 1 m. further, Plasnewydd, a fine Seat of the Marquis of Anglesea; close to which is a Druidical Monument, called a Carnedd.

Menai Bridge, being of unusual Extent, Mr. Telford, the Engineer employed by the Parliamentary Commissioners, conceived the bold Design of passing the Road over this awful Chasm and rapid Tideway by Means of a Bridge of Suspension, which promises to form a new Æra in Bridge Building, and enable the Engineer to cross, with Facility and Safety, Streams and Chasms formerly deemed imprac-
