Calculating the price of your mailing

Step 1: Find the full price for the service from table 1

Step 2: Identify the appropriate sortation and machineability discounts from table 2

Step 3: Add to the sortation and machineability discount the applicable volume related discount from table 3

Step 4: Apply the aggregate discount to the full price to calculate the item price for direct and residue items.

Step 5: Multiply the direct and residue prices by the number of items in each category.

Step 6: Add the direct and residue values together to calculate the total transaction price.

Worked example

A Mailsort 3 700 posting of 102,439 letters weighing 72g each. 98,277 of these are directs and 4,162 are residues.

- o Step 1: The full price for a Mailsort 3 700 Letter = 19.5p from table 1

- Step 2: Sortation and machinability discount for direct = 19% from table 2
Sortation and machinability discount for residue= 10% from table 2
- Step 3: VRD from table 3 = 4.5%, added to the direct discount of 19% the total discount for direct items now becomes 23.5%
- Step 4: Price of directs = $19.5p * (100\% - 23.5\%) = 14.9175p$
Price of residues = $19.5p * (100\% - 10\%) = 17.55p$
- Step 5: Total price of directs in mailing = $(14.9175p * 98,277)/100 = £14,660.47$
Total price of residues in mailing = $(17.55p * 4162)/100 = £730.43$
- Step 6: Total price for transaction = $£14,660.47 + £730.43 = £15,390.90$

	Packet20	20000 +	3.0%	0.0%	3.0%	0.0%	5.3%	0.0%

Calculating the price of your mailing

- Step 1: Find the full price for the items you are mailing. For items upto 250gm this just requires reading off the full price from table 1 for the service used and the format of the items mailed. Above 250gm Royal Mail uses straight line pricing, the full price for a specific weight is calculated by taking the full base price shown for the weight band and adding in the appropriate per gram supplement. This result is rounded to the 1/10th of a penny.
- Step 2: Identify the appropriate sortation and machineability discounts from table 2
- Step 3: Add to the sortation and machineability discount the applicable volume related discount from table 3
- Step 4: Apply the aggregate discount to the full price to calculate the item price for direct and residue items.
- Step 5: Multiply the direct and residue prices by the number of items in each category.
- Step 6: Add the direct and residue values together to calculate the total transaction price

Worked example

A Mailsort 2 1400 posting of 102,439 Large letters weighing 302g each. 98,277 of these are direct and 4162 are residues.

- Step 1: The full price = $36.7p + ((302 - 250) * 0.1260) = 43.252$ rounded = 43.3p
- Step 2: direct discount = 12%, residue discount = 7% from table 2
- Step 3: VRD from table 3 = 3.0%, added to the direct discount of 12% the total discount for direct items now becomes 15%
- Step 4: Price of direct = $43.3p * (100\% - 15\%) = 36.805p$
Price of residue = $43.3p * (100\% - 7\%) = 40.269p$
- Step 5: Price of direct in mailing = $(36.805p * 98,277) / 100 = £36,170.85$
Price of residue in mailing = $(40.269p * 4162) / 100 = £1,676.00$
- Step 6: Total for this transaction = $£36,170.85 + £1,676.00 = £37,846.85$

11. Mailsort Light

The discount for Mailsort Light remains at 4.5p per item.

12. Mailmedia

There will be a mailmedia pricing calculator available online from December 31st on the mailmedia homepage at

<http://www.royalmail.com/portal/rm/content1?catId=14400234&mediaId=13500195>

Volume Related Discounts

Volume related discounts are not available for Presstream or Presstream Walksort.

Calculating the price of your mailing

- o Follow the steps shown for Mailsort 1400 save that step 3: should be ignored as there are no VRDs available on Presstream or Presstream Walksort

15. Presstream Profile Price Discounts

Profile discount % = A x B

A (%) = ((number of Direct Selection items going to qualifying postcodes / the total number of Direct Selection items) x 100) x 0.645 - 4.0

B = total number of Direct Selection items / the number of unique Direct Selection addresses

Calculated to one decimal place

Presstream Profile - Minimum Prices

Maximum discount allowed - 28%

	Minimum Price
Presstream profile 1st Cl	23.3
Presstream profile 2nd Cl	21.4
Presstream Walksort profile 1st Cl	22.0
Presstream Walksort profile 2nd Cl	20.3
